SUMMARY

MCA graduate and Software Testing Intern at Camerin Innovates with training from EY Edunet. Skilled in Java, Python, SDLC, and both manual and Selenium automation testing. Experienced in test case design, execution, bug tracking, and QA processes, with additional knowledge in web development. Along with knowledge in web development, enabling better understanding of application functionality and efficient debugging. Eager to grow as a Junior Test Engineer.

EDUCATION

MCA (Master of Computer Applications)

College Of Engineering Chengannur (CEC), Kerala Technological University (KTU) | 2023 - 2025 | CGPA: 7.91

Bcom (Computer and Taxation)

Kristu Jyoti College of Management and Technology (KCMT), Mahatma Gandhi University (MGU) | 2020 - 2023 | CGPA: 7.22

SKILLS

- **Testing & Analysis:** Manual Testing, Test Case Design & Execution, Defect Tracking, Bug Reporting, API Testing (Postman), Selenium.
- **Web Technologies:** Java, Python, Web Development (HTML, CSS, JavaScript), MERN.
- **Database & Data Management:** SQL, Data Handling, MongoDB, Cloud.
- **DevOps & Tools:** Git, GitHub, Jira, Selenium IDE.

PROJECTS

Demoblaze E-commerce Website Testing | Feb 2026 - March 2026 📁,

Tools used: Manual Testing, Test Cases, Bug Report.

- Managed comprehensive manual testing processes by preparing and executing over 100 detailed test cases for a live e-commerce platform, ensuring 99% bug-free deployment.
- Led the defect identification phase by accurately documenting bug reports with reproducible steps, expected outcomes, and actual results to accelerate issue resolution.

ParaBank Banking Website Testing | Mar 2026 – Apr 2026,

Tools used: Manual Testing, Test Cases, Bug Report.

- Executed 100+ test cases for the ParaBank application, ensuring reliable and high-quality performance.
- Performed functional testing on core banking modules for smooth user experience.

SIP Trunking Documentation Website – Developed & Tested | Sept 2025 – Dec 2025

Tools Used: Selenium IDE, Bug Reporting, HTML, CSS, React.js.

- Engineered a specialized documentation website to effectively communicate the complexities of SIP trunking within VoIP systems.
- Performed manual and basic automation testing to ensure functionality, usability, and error-free performance.

Church Information Portal – Development & Testing (Freelance) | Jan 2026,

Tools used: Selenium IDE, Bug Reporting, MERN Stack.

- Designed an intuitive and visually engaging user interface for a church information portal, focusing on user experience and responsive modern web standards.
- Conducted both manual and automation testing using Selenium IDE to ensure functionality and performance.

CERTIFICATION

- Camerin Indian institute of upskill Software Testing Internship Certification (2026).
- Infosys Springboard Software Testing Certificate (2025).

Professional Experience

Quality Assurance & Testing Intern | Camerin Indian Institute of Upskill | Jan 2026 – Present

- Conducted rigorous data verification and back-end functionality testing, ensuring seamless data integration and identifying 15+ critical vulnerabilities before production.
- Followed strict testing SOPs to author and execute 100+ comprehensive manual test cases, accurately documenting reproducible steps and expected outcomes.
- Collaborated closely with QA supervisors to address data inconsistencies and system defects, maintaining a 98% bug-free environment and ensuring maximum productivity.
- Utilized automated scripts to reduce manual verification effort by 35%, demonstrating an ability to process large volumes of data efficiently while maintaining quality.
